Route 31 at Sanatorium Road to Main Sreet, bridge replacement

The project includes a complete bridge replacement of the Sanatorium Road bridge over Spruce Run with a new, slightly wider structure, as well as a minor realignment of Sanatorium Road with Fountain Grove Road (a local road on the west side of Route 31) for improved intersection operations. The bridge will have a 12-foot lane in each direction, 8-foot shoulders, and a 6-foot sidewalk along the south side. An aesthetic concrete parapet w be compatible with the historic district. The existing bridge will be utilized to accommodate the traffic during construction. No detour is required.

29 Delaware River Bluffs, Stockton to Frenchtown	00362K

The objective of this project is to enhance the transportation experience for those traveling along the Route 29 Scenic Byway and the Delaware and Raritan Canal Path. This will be accomplished through the acquisition of scenic easements and land in the viewshed of the Route 29 Scenic Byway and Canal Path along a ten-mile stretch in Delaware and Kingwood Townships. While protection of the entire Byway is important, in this project we will focus on the vistas of this key section, where the State of New Jersey Green Acres Program is interested in partnering on land and easement acquisition projects. The goal is to maintain the vistas of the Byway and Canal Path by permanently preserving highly visible parcels, and therefore viewsheds, along the east side of Route 29.

The federal FY 2002 National Scenic Byways Program provided funding of \$1 million for this project.

The purpose of this study is to compare alternative guide rail treatments to replace existing guide rail and identify locations where new guide rail is warranted or can be removed along Route 29 to promote further enhancement of the corridor from Trenton to Frenchtown. Guide rail is proposed for replacement in order to enhance the aesthetic character of the site. Although efforts should be made to minimize right of way, utility and environmental impacts these types of impacts may be justifiable if guide rail can be eliminated.

Roadside Enhancements

00362B

The Scenic Byways Management Plan for Route 29 was completed in August 1997. Objectives of the scenic byways management plan are to coordinate and prioritize state agency initiatives to acquire easements, remove billboards, encourage bicycle use, and otherwise enhance the scenic qualities of Route 29 in a way that balances demands of traffic tourism and the development of the region. This work effort entails identifying small-scale maintenance items that can be fixed quickly and identifying other items that may need more study to repair. In addition, a sign inventory will be conducted to determine the ownership billboards and signs along the corridor and determine if any excessive signage exists and can be removed to further enhance the scenic byway corridor.
